Performance measure:	3.09 Access to mental health services
Definition:	<p>Mental Health Mental health is a positive state of well being in which the individual can cope with the normal stress of life and reach his or her potential. Mental illness is a 'clinically diagnosable disorder that significantly interferes with an individual's cognitive, emotional and social abilities'.¹</p> <p>Social and Emotional Wellbeing Social and emotional well being problems are distinct from mental illness although the two interact and influence each other.² The Aboriginal definition of health recognises that achieving optimal conditions for health and well being requires a holistic and whole of life view of health, referring to the emotional, social and cultural well being of the whole community.³</p> <p>Health to Aboriginal peoples is 'not just the physical well-being of the individual but the social, emotional and cultural well-being of the whole community (NAHS).⁴</p> <p>For Aboriginal and Torres Strait Islander peoples health does not just entail the freedom of the individual from sickness but requires support for healthy and interdependent relationships between families, communities, land, sea and spirit. The focus must be on spiritual, cultural, emotional and social well being as well as physical health.⁵</p> <p>Mental Health Service Settings Mental health services can be provided in ambulatory or non-ambulatory settings. Ambulatory mental health care settings range from care provided in the primary care setting through to ambulatory care in hospital based outpatient services, community based mental health care and same day admitted patient mental health care in specialised psychiatric and general hospitals. Non-Ambulatory mental health care settings include admitted patient mental health care in specialised psychiatric and general hospitals and residential mental health care. Mental health services are provided by a range of health professionals such as psychiatrists, GPs, psychologists, counsellors and Aboriginal mental health workers.</p> <p>Indigenous status: Indigenous status is defined in the National Health Data Dictionary⁶ as a measure of whether a person identifies as being of Aboriginal and Torres Strait Islander origin.</p> <p>This data element is based on the ABS standard for Indigenous status. This is in accord with the first two of the three components of the Commonwealth working definition: 'An Aboriginal or Torres Strait Islander is a person of Aboriginal or Torres Strait Islander descent who identifies as an Aboriginal or Torres Strait Islander and is accepted as such by the community in which he or she lives.' (National Health Data Dictionary) In practice, it is not feasible to collect information on the</p>

Mental Disorders

- Symptoms related to thinking, feeling, or behavior
- Caused by genetic, biological, social, chemical or psychological influences
- Result in impairment of functioning
- Meaning of illness related to culture
- *Diagnostic and Statistical Manual of Mental Disorders* definitive source for information
- People are not defined by their illness

Definition of mental illness

- Definition of mental illness

"disorder of mood, thought, perception, orientation and memory which causes significant distress to a person or impairs that person's ability to meet the demands of daily life and includes mental conditions associated with the abuse of alcohol and other drugs, but does not include mental retardation"

Mental Health – definition

- ▶ **Mental Health – reflects a person’s ability to cope with the daily demands of life (i.e. deal with stress), have a positive self–concept, and be free from mental illness.**

DEFINING “MENTAL DISORDER” IN LEGAL CONTEXTS

There is no definition of a mental disorder. It’s bullshit. I mean, you just can’t define it (Allen Frances, lead editor of the DSM-IV, quoted in Greenberg, 2011, p. 126).

1. Introduction

If asked, most people would probably have little difficulty providing an example of a mental disorder. But if they were asked to *define* the term “mental disorder” it seems likely that they would struggle. While their response may refer to the mind “not working properly” in some way, or to some sort of internal condition that causes a person’s thinking or behavior to become disordered or dysfunctional, they would probably have trouble spelling out exactly what they meant by these explanations. What does it mean for the mind to “not work properly”? When is a condition considered to be “internal”? What does it mean for a person’s behavior or thinking to be “disordered” or “dysfunctional”? These questions cannot easily be answered, without the responses becoming circular.

It is important to note that these are not merely academic questions. The way in which mental disorder is defined can “configure and reconfigure the lives of real men and women” (Rosenberg, 2002, p. 250). This can be seen by considering a concrete example, such as whether “internet gaming disorder” should be regarded as a mental disorder.¹ The answer to this question will affect:

- Individuals who suffer from the alleged disorder: it may affect their access to treatment, payment for that treatment, whether they are considered to be “sick” and entitled to paid leave from their work, and the shame or stigma attached to their actions;
- Healthcare professionals: it may affect their role in treating affected individuals, what kinds of treatment are considered to be appropriate, and the funding they will receive for any treatment given;
- Insurance companies: it may affect their obligation to reimburse affected individuals for any medical expenses incurred; and
- Governments, public agencies and universities: it may affect their strategies for funding, research, intervention and treatment.²

In legal contexts, the classification of an individual’s mental health condition as a mental disorder can have far-reaching consequences. For example, in the criminal context it can result in the individual

¹ Consideration was given to including internet gaming disorder in the fifth edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-5). However, it was ultimately included in the section titled “Conditions for Further Study” (American Psychiatric Association, 2013, pp. 795-798).

² See Hyman (2012, p. 158) for a discussion of similar factors in the context of pathological gambling.

They usually follow a constant course, instead of the μ and recession periods that characterize many mental disorders. The intellectual disability is characterized by the diminution of abilities in various areas of development, such as cognitive functioning and adaptive behavior. The structure for daily routines helps to avoid unnecessary stress, with regular times to eat, play, learn, be with others and sleep. Much can be done, however, to support and improve the lives of people with disabilities and their caregivers and relatives. Developmental disorders, including autismDevelopmental outlook A comprehensive term encompassing intellectual disability and generalized developmental disorders, including autism. Worldwide, an estimated 264 million μ are affected by depression.1 More women are affected than men.Depression is characterized by sadness, loss of interest or pleasure, feelings of guilt or low self-esteem, disturbed sleep or appetite, tiredness and concentration. It focuses on a set of μ conditions, guiding capacity building for healthcare providers who are not specialized in an integrated approach that promotes mental health to all care levels.RefersGBD 2017 Collaborators of Incidence and Prevalence of Diseases and μ . Common psychotic experiences include hallucination μ (hearing, seeing or feeling things that are not there) and delusional (false beliefs fixed or suspected that are firmly maintained, even when there are μ to the contrary). These are mood-stabilizing medicines. (2018). Psychoses, including schizophrenia, are characterized by μ in thought, perception, μ , language, sense of self and behavior. DOI: 10.32279/Wang et al., (2007). Developmental disorders usually originate in the or the first inspection. The Lancet.
